DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frank Abramonte (Reg. No. 38,066) on 02 November 2005. Please amend the claims as follows:

- cancel claims 1-3
- In the first paragraph of page 1 of the specification, replace "This application claims the benefit of U.S. Patent Application No. 09/490,626 filed January 24, 2000 where this application is incorporated herein by reference in its entirety." with --This application is a divisional and claims the benefit of U.S. Patent Application No. 09/490,626 filed January 24, 2000 (now US Pat. No. 6,687,403), where this application is incorporated herein by reference in its entirety.--

Allowable Subject Matter

2. Claims 4-12 are allowed.

3. The following is an examiner's statement of reasons for allowance: The cited prior art teaches all of the limitations of independent claims 4 and 9 except for the final limitation (found in both claims 4 and 9) of "storing at the location of the later occurring of the two contour point pixels, coordinates of the earlier occurring contour point pixel, if the two contour point pixels fall within selected parameters relative to each other." (quoted from claim 9). This limitation, when put in combination with the other features recited in claims 4 and 9, respectively, is not taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US 2005/0117781 (Aoyama) – teaches straight-line detection in a bar code environment

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick L. Edwards whose telephone number is (571) 272-7390. The examiner can normally be reached on 8:30am - 5:00pm M-F.
